## Therapeutic approaches used during the intensive

During the past 50 years, Dr. Kaplan has incorporated over 30 disciplines into his unique Energetic EyeHealing Approach. Here is a sampling of what you could experience during your holiday Intensive.

- \* Hearing information about your genetics and family history that is related to your eye condition. This information is used to upload new perceptions that impact the regenerative process.
- \* Seeing through modified lens prescriptions that act as a homeopathic remedy to assist the energetic healing.

- \* Using an eye chart to get direct feedback how your emotional state affects your eyesight.
- \* Receive a spinal and/or micro electro stimulation that modifies the nerve impulses to the lens and pupil of the eyes.
- \* Experience how posture and relaxation of the neck has an affect on astigmatism.
- \* Experience how light and colour impacts healing in the eyes.
- \* How to use audio self healing material for increasing healing potential of eye tissue.
- \* Which foods and herbs can benefit eye regeneration.
- \* How to incorporate different 'eye foods' into your meal preparation.

- \* How to embrace your eye condition as a gift with a clear message for re-perceiving your life.
- \* Recognise the connections between emotion and eye conditions.
